- Efficient Class-D Operation
- Support mono and stereo mode
- Frequency response 20Hz to 20kHz
- THD+N 1%
- SNR 95dB

### **DESCRIPTION**

---

The AMP-4840 is an amplifier expansion card for use with EMCEE200. The audio expansion card adds 20 watts per channel of audio output to two speakers at 4Ω or 8Ω (user selectable). The amplifier card also supports both mono and stereo modes via toggle button.
