HT-CAM-4K-EPTZ
Auto Framing 4K EPTZ Camera

User Manual
Version: 1.0
Attentions

This manual introduces functions, installations, and operations for this camera in details. Please read this manual carefully before installation and use.

1. **Cautions**
   1.1. Avoid damage to product caused by heavy pressure, strong vibration, or immersion during transportation, storage, and installation.
   1.2. Housing of this product is made of organic materials. Do not expose it to any liquid, gas or solids which may corrode the shell.
   1.3. Do not expose the product to rain or moisture.
   1.4. To prevent the risk of electric shock, do not open the case. Installation and maintenance should only be carried out by qualified technicians.
   1.5. Do not use the product beyond the specified temperature, humidity, or power supply specifications.
   1.6. Wipe it with a soft, dry cloth when cleaning the camera lens. Wipe it gently with a mild detergent if needed. Do not use strong or corrosive detergents to avoid scratching the lens and affecting the image.
   1.7. This product contains no parts which can be maintained by users themselves. Any damage caused by dismantling the product by user without permission is not covered by warranty.

2. **Electrical Safety**
   Installation and use of this product must strictly comply with local electrical safety standards.

3. **Install**
   3.1 Do not rotate the camera head violently, otherwise it may cause mechanical failure.
   3.2 This product should be placed on a stable desktop or other horizontal surface. Do not install the product obliquely, otherwise it may display inclined image.
   3.3 Ensure there are no obstacles within rotation range of the holder.
   3.4 Do not power on before completely installation.

4. **Magnetic Interference**
   Electromagnetic fields at specific frequencies may affect the video image. This product is Class A. It may cause radio interference in household application. Appropriate measure is required.

2.2 Main Features

HT-CAM-4K-EPTZ is a 4K ultra-high-definition EPTZ camera with a new design. With AI intelligence, it can frame according to the number of people in the scene, and the characters will be framed in the middle. It has advanced functionality and superior performance, which employ advanced ISP processing algorithms to provide vivid images. These images are clear and bright, with strong colour layering, high resolution, and fantastic colour rendition. It is easy and to install and maintain together with being stable and reliable.

- **Ultra HD 4K Resolution**: 1/ 2.8-inch-high quality CMOS sensor. Resolution is up to 4K with frame rates up to 30fps (MJPG) or 30fps (H.264); compatible with 1080P and 720P.
- **ePTZ**: ePTZ and 10X digital Zoom.
• **Built-in MIC:** Built-in two omni-directional MIC pickups; with unique noise suppression algorithm, effective pickup distance up to 6 meters.

• **Auto Framing:** Employing a superior face detection algorithm to intuitively and automatically frame according to the number of people in the scene, keeping the characters in the middle.

• **Wide FOV:** 83°/100°/120° wide angle and small distortion lens options.

• **Video output interface:** Video output interface USB3.0

• **Multiple Audio/ Video Compression Standards:** Supports H.264, MJPG, YUY2, NV12 video compression to make video play smoothly.

• **Low Noise and High SNR:** Super high SNR image is achieved with low noise CMOS. Even in ultra-low light situations, the picture remains clean and clear.

• **Multiple Installation Methods:** Standard equipped with screen clamp. Easy to install on any devices, such as LCD screens, laptops, tables, and a tripod.

• **Easy to Use:** No need to download any drivers; USB 3.0 Plug and play; Wide Applications: Personal video conferencing, enterprise video conferencing, collaboration meetings, etc.

### 2.4 Interface Instruction

#### 2.4.1 External Interface

Figure 2.4 Wiring Diagram
3. Application Instruction

3.1 Remote Control

3.1.1 Keys Introduction

1. Infrared indicator light

2. Stand By
The device enters standby mode after pressing it once, and the device re-displays the picture after pressing it again.

3. Menu Button
Enter/exit the OSD menu or return to the previous menu.

4. Pan/Tilt Control
Up: press ▲
Down: press ▼
Left: press ◀
Right: press ▶

Press and hold the up/down/left/right key, the pan/tilt movements will keep running.
【OK】 Camera lens will return back to the middle position; Enter next menu

5. Number key
Number keys 1, 2, 3: preset position setting, calling, or deleting
Note: Short press for 1s [preset position recall]; long press for 3s [preset position setting]
Long press for 5s [preset delete]

6. Zoom Control
【🔍】: press 【🔍】 key to zoom in
【🔍】: press 【🔍】 key to zoom out

7. Auto Framing Function Key

3.1.2 Applications

1. In this manual, “press the key” means a click rather than a long-press, and a special note will be given if a long-press for more than one second is required.
2. When a key-combination is required, do it in sequence. For example, “[*] + [#] + [F1]” means press “[*]” first and then press “[#]” and last press “[F1]”.

1. **Infrared indicator light**
   1. Flashing (red): Sending instructions
   2. No flashing: do not send instructions

2. **Standby, Menu Setting**
   1. Standby button: turn on or turn off the camera image
   2. Menu key: call up the camera OSD menu

3. **Pan/Tilt Control**
   Rotate up: press [▲] key
   Rotate down: press [▼] key
   Rotate to the left: press the [◀] key
   Rotate to the right: press the [▶] key
   Middle position: press [OK] key
   Long press the up, down, left, and right rotation buttons, it will continue to rotate from slow to fast until the end of the stroke; release it halfway to stop the rotation.

4. **Preset position setting, calling, deleting**
   1. Save the preset position: Long press (within 3s-5s) one of the number keys 1 to 3, and a preset position corresponding to the number key will be preset.
   2. Call the preset position: directly press the number keys 1 to 3 to call the saved preset position.
   3. Delete preset position: Long press (5s) one of the number keys 1 ~ 3 to delete a preset position corresponding to the number key.
   Note: If the number key is not preset, it is invalid.

5. **Zoom Control**
   1. Zoom in the lens: press the [🔍] key
   2. Zoom out the lens: press [🔍] key
   3. Long press these two buttons, it will continue to zoom in/out; release it halfway and stop.

6. **Auto Framing Function On/Off**
   Turn on/off Auto Framing Function
3.2 Menu Introduction

3.2.1 Main Menu

Press 【MENU】 key under MJPG, YUY2, NV12 or H264 compression encoding format output to display the menu, using scroll arrows to point at or highlight the selected items.

![Menu Diagram]

1. Language
   1. Language Setting press 【← →】 key to select Language

2. System Setting
   Move the pointer to the (Setup) in the Main Menu, click the 【OK】 key and enter into the SYSTEM SETTING menu as shown below:

![System Setting Diagram]
Image Style: default / standard / clear / bright / soft can be set
Intelligent zoom: on / off

3. Exposure Setting
Move the pointer to (EXPOSURE) in the Main Menu, click the 【OK】 and enter the EXPOSURE SETTING menu as follows:

![EXPOSURE Setting Diagram]

Mode: Auto, Manual, Shutter priority and Brightness priority.
EV: On/Off (only available in auto mode)
Compensation Level: -7~7 (only available in auto mode when EV is ON)
BLC: ON/OFF for options (only available in auto mode)
Anti-Flicker: OFF/50Hz/60Hz for options (only available in Auto/Iris priority/Brightness priority modes)
Gain limit: 0~15 (only available in Auto/ Iris priority /Brightness priority mode)
WDR: Off, 1~8
ShutterPriority:1/30,1/50,1/60,1/90,1/100,1/120,1/180,1/250,1/350,1/500,1/1000,1/2000,1/3000,1/4000,1/6000,1/10000 (only available in Manual and Shutter priority mode)
Brightness: 0~23 (only available in Brightness priority mode)

4. Colour
Move the pointer to the (COLOUR) in the Main Menu, click the 【OK】 and enter the COLOUR sub menu as follows:
WB Mode: Auto, Manual, One Push, Specified color temperature 
Saturation: 60%,70%,80%,90%,100%,110%,120%,130%,140%,150%,160%,170%,180%,190%,200%
AWB Sensitivity: high/middle/low (only available in automatic mode)
Chroma: 0~8

5. Image
Move the pointer to the (IMAGE) in the Menu, click the 【OK】 and enter into the IMAGE sub menu as follows:
Brightness: 0~14
Contrast: 0~14
Sharpness: 0~15
Flip-H: On/Off
Flip-V: On/Off
B&W Mode: color, black/white
Gamma: Default/0.34/0.39/0.47/0.5
Minimum Illumination: On/Off

6. Noise Reduction
Move the pointer to the (NOISE REDUCTION) in the Menu, click the 【OK】 and enter the NOISE REDUCTION menu as follows:

![NOISE REDUCTION Menu]

2D Noise Reduction: Auto, close, 1~7
3D Noise Reduction: Close, 1~8

7. Version
Move the pointer to the (VERSION) in the Main Menu, click the 【OK】 and enter the (VERSION) as follows:

![VERSION Menu]
8. Restore Default
Move the pointer to the (RESTORE DEFAULT) in the Main Menu, click the 【OK】 and enter the RESTORE DEFAULT as follows:

![RESTORE DEFAULT Menu]

Restore default: YES/NO. Colour style and video format cannot be restored to factory default.

Note: If the address of former remoter is not 1 but another one from 2, 3, 4, the corresponding camera address will restore to 1 when all parameters or system parameters are restored. User should change the remoter address to be 1 (press No.1 according to the camera so to get normal operation)
4. Maintenance and Troubleshooting

4.1 Camera Maintenance

1. Please power off the camera and disconnect the power adapter and socket if it is not going to be used for a long period of time.
2. Use a soft cloth or tissue to clean the camera cover.
3. Wipe it with a soft, dry cloth when cleaning the camera lens. Wipe it gently with a mild detergent if needed. Do not use strong or corrosive detergents in order to avoid scratching the lens and affecting the video quality.

4.2 Troubleshooting

1. No video output
   a. Check whether USB cable is connected well and the power indicator light is ON.
   b. Check if the machine could do a self-check after restarting.
   c. Restart the computer to check that the computer is operating normally.
   d. Check whether the video output cable or video display is normal
   f. Check whether the camera is properly recognized by the PC
2. No image sometimes
   a. Check the USB cable quality and that it is connected well.
