

GC-HD-DP

GC-HD-DP

- Connect a HDMI video source to a DisplayPort monitor
- Supports resolutions up to 4K x 2K @ 30Hz, 1080p @ 120Hz and 3D
- HDMI 1.4b and HDCP 1.3 compliant
- VESA Dual-Mode DisplayPort 1.2a compliant
- Supports up to 8-channel LPCM and HBR audio up to 192Khz
- Plug-N-Play

The Hall Research Model GC-HD-DP HDMI™ to DisplayPort Adapter cable is perfect for converting HDMI™ to a DisplayPort format for display on an DisplayPort LCD.

The pigtail style construction does not protrude from the source and provides a flexible connection.

No external power supply is normally required, but a Male USB-A connection is available to supply power if required.

No drivers, Plug and play operation.
